

New Wied Dec. 10th 1854
Texas Comal County

Dear Sir

My best thanks for your letter of November
the 7th. Yours I only have *Plantago virginiana*
years I got it and will be glad to receive from you
what you can send me, the best way I think
will be by Mail.

I send again some plants wherefrom I wish
you would give me the names

No. 11 of the last I could not make out.

No. 18 *Eupatorium serotinum* as you give me the
name I send again under No. 47. and there to
what I until now look for *Eupatorium serotinum*
under No. 48. what is the right name of both plants?

Of *Lysimachia reticulata* I possess only one specimen
I will collect it for you next spring and send it.

A letter from me, wherein I did ask for
a little seed, if possible, of *Acheron Emadi*
and *Carica Senegalensis* or *Mangifera* I hope you
have received and will be happy to have an unsuccessful
answer.

I am

Yours very cordially

L. C. Enck
